## Local woman charged with human smuggling

**BY LEW K. COHN**  
Inquirer Publisher

A Gonzales woman was one of two people arrested and charged with human smuggling after a high-speed chase in Kinney and Maverick counties in West Texas on Monday, April 10.

Joanna Jeanette Bermea of Gonzales remains in the Kerr County Jail in lieu of \$110,000, according to the Kinney County Sheriff's Office and Kerr County Jail records.

Bermea and Cynthia Rashel Vonette Stewart of Quinlan, near Dallas, were occupants in a black GMC Sierra pickup

truck when deputies and Texas Department of Public Safety attempted to initiate a traffic stop on US 90 in Kinney County.

They evaded officers and began a high-speed chase which took them onto Texas 131 and ended near US 277 in Maverick County.

During the chase, they

stopped several times, allowing suspected illegal aliens to bail out and run into the brush.

"Many times, this is done in the mistaken belief that drivers can avoid charges if there are no aliens in the car when they're finally stopped. This is

## GISD board approves pre-K tuition for 2023-24

**BY VANDY VAN EPPS**  
Gonzales Inquirer

The Gonzales Independent School District Board of Trustees met for their regularly scheduled meeting Monday, April 10 at the GISD Administration building.

One of the big items discussed was the 2023-2024 pre-Kindergarten Tuition Rate. GISD Chief Financial Officer Amanda Smith said the district has been doing this for three years and planning to do something different this year to make it easier for parents.

"In an effort to better meet the needs of our families, we will advertise the availability of a monthly payment option for the tuition. In the past, the only two payment options that have been utilized by the participants is either a pay in full option for the year or they have paid by the semester," Smith said.

Smith added the district "didn't see a reason" not to of-

## Harless made county's new fire marshal

Trammell appointed to replace Jahns on ESD 1 board

**BY LEW K. COHN**  
Inquirer Publisher

Gonzales County Emergency Management Director Jimmy Harless has another title after Monday's meeting of the Gonzales County Commissioners Court — Gonzales County Fire Marshal.

Commissioners voted unanimously to name Harless to the position that was last held by Sheriff Keith Schmidt when he was the Gonzales Fire Chief. It had been vacant since Schmidt was appointed sheriff in September 2021.

The position was discussed at the last court meeting but was tabled. On Monday, Precinct 2 Commissioner Donnie Brzozowski said he believes the county definitely needs someone in the position and that Harless would be a logical choice.

## Mighty Apache Band earns superior, excellent ratings at UIL competition

**SPECIAL TO INQUIRER**

The GHS Apache Band earned a superior rating in the stage performance part of their evaluation and earned an excellent rating in the second division for the sight reading

performance at the UIL Concert and Sightreading competition in Bastrop last week at the Jerry Wilhelm Performing Arts Center.

The band performed three song selections for the judges, including "Spania!" by David Shaffer, "Loch Lomond" by Jarod

Hall, and "Brave Spirit" by Randall Standridge, before wowing the judges.

"We were able to get the band back to its superior rating after they made a good rating in the fall," said Ramon Parker, GHS Band Director. "It's pretty remarkable."

# Domestic dispute leads to bomb scare in Hallettsville

## FROM STAFF REPORTS

Gonzales County Sheriff's deputies lent assistance to a situation last month in Hallettsville that ended up in a bomb disposal unit being called out from Austin.

It started when Hallettsville police officers were dispatched at 5:19 p.m. Wednesday, March 22, to the 100 block of South Main Street regarding a disturbance between a male and an unidentified female. When officers arrived, the

Day

adult male fled on foot toward the courthouse square. Officers pursued the male subject. On the southeast side of the courthouse, the male subject began to remove a device from his clothing and threatened officers with it, who then used a TASER to immobilize the suspect and make him drop the device. He was taken into custody in the

200 block of East Second Street.

Identified as James Adam Day, 43, of Vidor, the suspect had an outstanding parole warrant for his arrest. He was transported to the Lavaca County Jail and also charged with evading arrest/detention with a previous conviction, two counts of terroristic threat against a peace officer and possession of prohibited weapon. He remains in jail in lieu of \$50,000 bond.

Believing the discarded device to possibly be a bomb, the Hallettsville

police sought assistance from Lavaca County Sheriff's Office, Hallettsville VFD, GCSO, Lavaca County Emergency Management and Texas Department of Emergency Management, as well as the Lavaca County EMS, in maintaining a cordon around the item until an Austin Police Department bomb squad could come help identify the device. It was later identified as a grenade simulator and safely detonated by the bomb squad without any injuries caused or reported.

First responders had to shut down U.S. 87 between Smiley and the Gonzales County line due to an oil fire around 5 p.m. Thursday, April 6. Hwy 87 between Smiley and the county line is closed due to an oil fire. ## OFFICERS TRAIN WITH THE ALTERNATIVE

On Monday, April 3, Gonzales County Sheriff's Sgt. Trevino, Sgt. Lorton, and Cpl. Schwausch all attended training hosted by the Victoria County Sheriff's Office on a less-lethal device called The Alternative. The Alternative was designed and built by Alternative Ballistics and is designed to save countless lives and protect law enforcement in the line of duty. The Alternative is a less-lethal device designed to be used in a planned event where deputies are dealing with a hostile subject refusing to cooperate. The Alternative allows a projectile to impact a threat with less-lethal, non-penetrating energy, to incapacitate a targeted individual with little risk of death or critical injury. This allows deputies the ability to potentially use less than lethal force in order to protect suspects and take them into custody without serious injury or death. With this training, Sgt. Lorton, Sgt. Trevino, and Cpl. Schwausch are now qualified in carrying and deploying The Alternative, but also are certified instructors and can teach deputies and officers of other departments wishing to use The Alternative. GCSO is currently one of two agencies in the State of Texas with this capability.

# Nixon-Smiley Consolidated ISD turns off Facebook commenting due to scammers

## FROM STAFF REPORTS

One Gonzales County school district is just saying no to Facebook spam by turning off comments from outside parties on its Facebook page.

Nixon-Smiley Consolidated ISD sent out a notice to the community last week, letting them know of their decision to block comments on Facebook.

"We are sure you have all seen the 'Join us here for live sports' and/or 'Check out my profile if you want to make \$1500/week' in the comments section of our FB page," the letter from N-SCISD

read. "Unfortunately, a lot of them lead to very inappropriate websites and we do not in any way want our community to think we are endorsing any of these scams attached to our posts.

"We have contacted FB and we report/block the comments every time we see them but it has not stopped them from getting posted. Due to Facebook's inability to block those types of messages, we are going to have to start turning off all comments on FB."

To keep open communication lines and make things simple for legitimate parents, students and community mem-

bers who have an interest in Nixon-Smiley CISD, the district has done the following:

- Pinned a post to the top of their Facebook page that will include campus phone numbers and email addresses.
- Added contact phone numbers for all the campuses and organizations and an email address where you can contact them in the 'About' section to try to make it easier for parents/community

members to get the information they need.

- Created a standardized form that can be used to message the school on the school website by going to [www.nixonsmiley.net](http://www.nixonsmiley.net) and clicking on 'Contact Us.'
- "We sincerely apologize for being forced to limit our FB page, but in an effort to limit the scams and fake posts soliciting information, we feel it is the best thing to do at this time," the district said.

# USDA accepting applications for REAP grants

## SPECIAL TO THE INQUIRER

U.S. Department of Agriculture (USDA) Rural Development Texas State Director Lillian Salerno announced that USDA is accepting applications starting on April 1 for \$1 billion in grants to help agricultural producers and rural small businesses invest in renewable energy systems and make energy-efficiency improvements.

USDA is making the \$1 billion in grants available under the Rural Energy for America Program (REAP), with funding from President Biden's landmark Inflation Reduction Act, the nation's largest-ever invest-

ment in combatting the climate crisis.

"Supporting renewable energy and energy-saving systems helps the people of rural Texas create thriving, livable communities," said Salerno. "When we invest in rural communities, we are supporting hard work that creates a better future for our state. Clean energy is critical to the future of our economy, and the Inflation Reduction Act provides the Biden-Harris Administration with the resources to build a more prosperous rural Texas while tackling the climate crisis and lowering energy costs."

Recipients may use REAP

funds to install renewable energy systems or to make energy-efficiency improvements. Eligible applicants include rural small businesses and agricultural producers. USDA will hold competitions quarterly through Sept. 30, 2024. The funding will also include the creation of the first underutilized technology fund in the REAP program, with \$144.5 million available in dedicated funding.

USDA is particularly interested in REAP projects that will help rural communities recover economically through more and better market opportunities and improved infrastructure, reduce climate-pollution

and increase resilience to the impacts of climate change, conserve and protect farmland, and invest in underserved communities.

To ensure that small projects have a fair opportunity to compete for the funding, USDA will set aside at least 20% of the available funds until June 30 of each year for grant requests of \$20,000 or less, including the grant portion of a combined grant and guaranteed loan request.

The maximum federal share which may be requested is up to 50% of the total project cost for all energy-efficiency projects and zero-emissions renew-

able energy systems. An award of up to 50% of the total project cost is also available for any project in a designated energy community and/or submitted by an eligible tribal entity. All other projects are eligible to apply for grants of up to 25% of the total project cost. The maximum grant is \$1 million for renewable energy systems and \$500,000 for energy-efficiency projects.

For additional information on application deadlines and submission details, see page 19239 of the March 31 Federal Register. Complete applications must be received by June 30 to compete for FY funding.

## Rusty to the rescue...

They generally give us the benefit of the doubt even when we are dead wrong, wagging their tails while licking the hands that feed them. In their way, they pledge unending devotion, no matter what.

One doesn't have to look very far into literature or incline their ears to very many songs to hear dogs revered by the masses, but reviled by some who have no use for them.

Elvis Presley reminded some canines that they were "nothing but hound dogs," and an expression from the lips of thoughtless people suggests that some situations "shouldn't happen to a dog!..."

\*\*\*\*\*  
A canine defender compared dogs with cats. "When owners say 'sit' to their dogs, they usually sit. Extend the same command to a cat, and the pet responds that it'll 'get back with us later.'"

We who admit to being dog fanciers — and the same is probably true for feline owners — feel strongly about our choices. Reasons do not have to be given from either quarter.

Truth to tell, we don't have dogs; they have us....

\*\*\*\*\*  
All this aside, dogs assist the living in many critical ways. Think about it, you never hear about "drug-sniffing cats." And don't expect even the most muscular cat to join a dogsled team.

Thanks to the inquiring mind of Sharon Grigsby, brilliant Dallas Morning News journalist, we learn that at least one dog assists the dead as well.

His name is Rusty, and he's found his place in life. Instead of a junkyard dog, he's a graveyard canine who chooses to wander around the 27,000 resting places on the 48-acre Oakland Cemetery, where dirt was first turned in 1892....

\*\*\*\*\*  
Rusty and a pack of four other dogs wandered into the historic south Dallas cemetery some three years ago. Almost immediately, animal control personnel rounded up the animals, sans Rusty.

For more than six months, they tried repeatedly to capture Rusty, but he fell for none of their enticements. They set up video cameras and traps — not to mention his favorite treats — and nothing worked.

Finally, Rusty's file became inactive....

\*\*\*\*\*  
He has become a celebrity dog, says Monica Newbury (no relation). "Vets are offering free services, and visitors to the cemetery are bringing treats by the truckload," Monica said.

She warns, however, that Rusty gets along just fine without cuddling or petting, sometimes growling so folks will keep their distance. He not only roams the premises, but also barks when anyone enters the cemetery....

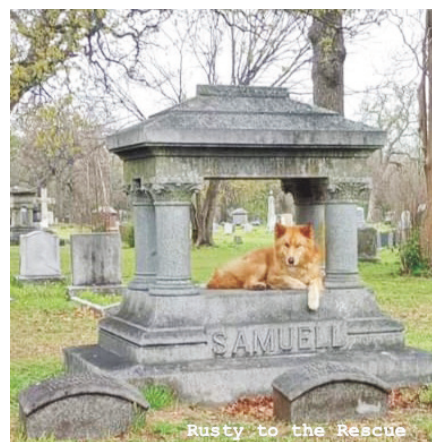

\*\*\*\*\*  
Several have offered to adopt the 60-pound collie mix, but no dice. The doggy in the window has a price; Rusty is not for sale.

The old cemetery has fallen on hard times, and it's hard to keep up with volunteer help.

A gift of cash or pledge to work honors Rusty and is invaluable to a storied cemetery. Interred there are numerous state representatives, eight mayors, a senator and numerous other luminaries. Many markers have names synonymous with street signs in Dallas and Highland Park....

\*\*\*\*\*  
Others include the founding president of Dallas Power and Light (now TXU). Two recently-discovered granite markers — 6-foot tall and 10-foot wide — mark resting places of persons who provided major funding

## Garden Q&A

with CALVIN FINCH

## Tasty tomatoes, lawn fertilization and more

**Q** We are interested in getting involved in the Monarch Butterfly Initiative. We want to include some native milkweed in our landscape and also some good nectar plants. What are your recommendations?

**A.** Obtain some tropical milkweed transplants from your favorite plant nursery. It works well until you get your native milkweed grown. Obtain the native milkweed such as antelope horn and green milkweed from Douglas King Seed Company in San Antonio or Native American Seed Company in Junction. Both will sell and deliver on the internet. You can also find a number of non-profits and educational organizations sponsoring initiatives. They will offer activi-

ties to help address the Monarch population challenges. For a good resource obtain the book, "Butterfly Gardening For the South" by Geyata Ajilvsgi.

**Q.** Our plum and peach trees finally received enough cold weather to bloom this year. What pesticides do you recommend that we spray to control the fungus and the insects? Stink bugs are always our toughest insect to control.

**A.** I have had success with and recommend malathion and captan spray every week. If you want to try an organic spray program consider sulfur and pyrethrin or spinosad.

**Q.** If our lawn grass is just starting to green up with the recent rain, when should we fertilize it?

**A.** You can wait until you mow

the grass twice before you apply a slow release lawn fertilizer such as 19-5-9. Some gardeners are using organic fertilizer on or about May 1 if the lawn is slow to recover. The organic lawn fertilizer releases its nitrogen even slower than the 19-5-9 so there shouldn't be any nitrogen loss.

**Q.** In your opinion what is the tastiest tomato for the backyard garden in our area?

**A.** I have 2 favorites. They taste different but are equally desirable. Try the small tomatoes Ruby Crush and BHN 968. Ruby Crush is sweeter, but BHN 968 is deliciously tart. Both of the selections are determinate so they reach full size quickly and concentrate on producing fruit.

## Tractor Supply to give free garden kits to kids

### SPECIAL TO THE INQUIRER

The Gonzales Tractor Supply is providing free garden kits to local children to teach the basics of at-home gardening. On April 22, customers can stop by the store to receive a TSC Future Gardeners Kit, while supplies last.

A team member will be available to answer questions and explain the best ways to nurture and care for the future garden, while sharing the importance of eating fresh fruits, vegetables, and herbs.

Each kit includes essentials like seed packs, topsoil, a bucket, and directions for watering and caring for the seedlings as they grow, providing children with a first-hand opportunity to learn about plant life and produce.

"At Tractor Supply, we strive to educate and inspire underserved communities and the next generation about all things Out Here," said Gonzales store manager, Lydia Grifaldo. "The unfortunate reality is that many young people lack access to fresh produce, let alone an opportunity to see how it grows. With these kits, we can share our knowledge and provide a fun opportunity to discover the thrill of growing fruits and vegetables."

To pick up a TSC Future Gardeners Kit, customers can visit the curbside pickup area from 11 a.m. to 3 p.m. For more information about this and other community initiatives, visit Tractor-Supply.com or contact the Gonzales store at 830-672-5707 or by going to the store at 1619 Hwy. 90A.

## Lady Mustangs hold off Lady Bulldogs in thriller for 1st place

BY VANDY VAN EPPS  
Gonzales Inquirer

The Nixon-Smiley Lady Mustangs and Marion Lady Bulldogs faced off in a battle for control of the district Tuesday, April 11 that ended in an 8-7 victory for the Lady Mustangs in 10 innings.

The Lady Mustangs and the Lady Bulldogs both entered the game 4-1 and tied for first

place in District 26-3A.

Both teams exchanged blows throughout a playoff-game atmosphere, but it was the Lady Mustangs who kept the game going and sent it to extra innings.

Senior pitcher and shortstop Mady Velasquez entered the game to pitch in the bottom of the sixth and she said the atmosphere of the game was “crazy” from the opposing fans

and Nixon-Smiley fan base.

“We had my defense behind my back and that was what mattered. And so made it a little easier on me when trying to block everybody out and just get the job done,” Velasquez said.

BY VANDY VAN EPPS  
Gonzales Inquirer

The Gonzales Lady Apaches were handed a tough 12-7 loss by the La Vernia Lady Bears Monday, April 10 at home.

The Lady Apaches led the game, 6-4, entering the sixth inning, but La Vernia scored eight unanswered runs.

Head softball coach Michelle Uribe said they made a pitching change in the sixth, but were unable to get the out that her team needed that turned into errors.

“I’m confident we have the right pieces, but we just have to be able to execute in those crucial moments. One thing that we can get out of this is experience and hopefully the next time that we experience that situation, we will make the play and come through,” Uribe said.

## Mustangs fall to Randolph in tough loss

### STAFF REPORT

The Nixon-Smiley Mustangs and Randolph Ro-Hawks squared off in Marion for the second half of district play on Monday, April 10. After dealing with a rain delay and a broken pipe in Randolph, both teams agreed to move the game to Marion High School Monday. The Mustangs fell in a close contest against Randolph, 7-5, and split the season series 1-1 for 2023. Nixon-Smiley drops to 3-3 in district play with four games left of the season. ton RBI double with two outs. Houseton said she was stressing out when she was up at bat, but in her mind, she had to get the RBI double for her team. Velasquez struck out the last batter in the bottom of the frame with runners on base to seal the win for the Lady Mustangs. "I know I had to do it for my team. We work hard to get back here and get back in this game. And 10 innings isn't easy, so I knew I had to finish it out for us," Velasquez said. Lady Mustangs head softball coach John Hoelter was proud of how his team battled through extra innings. "We did a good job when we got behind in the seventh inning. We battled

back, tied the ballgame and gave ourselves a chance. And you've gotta give credit to Marion because they kept fighting too," Hoelter said. "That was a good ball game. It was like a playoff atmosphere. Both teams wanted it pretty bad. And we were fortunate to come out on top," Hoelter added. Hoelter knew entering game with both teams tied for first place, it was going to be difficult, he said, and Marion has been playing well all season, just like his team. "We knew it was going to be this kind of a game. But win or lose, it was just a good game to be involved with and to watch and stuff," Hoelter said. The Lady Mustangs have two games

left in the regular season and the district title is in sight; they will have a big rematch against Cole Friday, April 14, the team who handed them their only loss in district so far. First pitch is at 6 p.m. "They know what's at stake. If they want to win a district championship, they've got to take care of business and take it one game at a time and you can't overlook anybody because anybody can beat anybody in this district," Hoelter said. The Lady Mustangs will then play Luling at home on Tuesday, April 18, for Senior Night, and have a non-district game against FEAST in Seguin on Friday, April 21. The Luling game starts at 6:30 p.m. while the FEAST game starts at 5:30 p.m.

"There's not much time the mental preparation will have to be on the bus on the way there because that's tomorrow, so we'll watch a little bit of film on the bus and make sure we know what to expect hitting wise and hopefully be able to execute offensively and defensively," Uribe said. Gonzales will face Navarro Friday, April 14 at home. First pitch is set for 7 p.m.

# County will use Victoria company to provide records shredding services

BY LEW K. COHN  
Inquirer Publisher

Gonzales County will enter into an agreement with The Back Office, a Victoria company, to provide shredding services for the Gonzales County Sheriff's Office as well as other county offices to make sure old, sensitive paper records are handled and destroyed in the proper way.

Sheriff Keith Schmidt had discussed at a previous meeting the need for having a company shred old paper records that contain highly sensitive information, including data that must be handled securely by law.

County Auditor Becky Weston said she had also spoken to Precinct 3 Justice of the Peace Jesse Almaraz, who indicated he also has about 25 to 30 boxes of old case files that need to be shredded in a secure manner.

"(Almaraz) said he was taking his somewhere else that they would shred it right in front of him," Weston said. "This company (The Back Office) we located will come here on site and they will shred it on site and not take it with them."

"We already have an appointment set up for the county attorney (to have documents shredded). Most of us would only need it once a year, but we're in a little different situation (than the Sheriff's Office)."

Schmidt said he believed it would be in the best interest of the county to have one provider that was responsible for shredding services instead of multiple vendors.

He also mentioned that his department "historically have been just been buying these really cheap little shredders that have been sitting in every office, but they continue to break and it's just an ongoing expense. These shredders can cost like \$1,000 and they may last like six months or something like that."

"I think we need to put a

couple of trash cans in the office that are padlocked and they'll come by every month or every few months to take care of them," Schmidt said.

The Back Office would charge the county based on the total weight of what is being shredded. Precinct 4 Commissioner Collie Boatright Jr. said the other county offices could bring their paper files to the sheriff's office as needed to be weighed and shredded and the cost for that service can be applied back to the appropriate budget.

Commissioners agreed to try out the service until the next budget cycle to determine if it works for what the county needs and then they may contract for a longer period of time in the next budget year.

The court also voted to donate some county equipment that is no longer needed to the City of Smiley, which will use the equipment as it furnishes its new City Hall, especially the municipal courtroom. The request was made by Precinct 4 Justice of the Peace Darryll Becker.

That equipment which is being donated includes six church pews (two at the county annex and four from the Precinct 2 commissioner's office), a metal desk from the county annex, a judicial bench and accessories and six lights.

Commissioners also received the 2023 motor vehicle sales tax commission report from Tax Assessor-Collector Crystal Cedillo, which indicated Gonzales County will receive \$150,666.34, which equals five percent of the tax and penalties collected for Motor Vehicle Sales and Use Tax, Motor Vehicle Seller-Financed Sales Tax and Texas Emissions Reduction Plan (TERP) Surcharge collections reported in Gonzales County during the 2022 calendar year. This breaks down to \$149,551.51 retained from 2023 Motor Vehicle Sales Tax collections and \$1,114.83 retained from TERP Surcharge collections.

**Fun By The Numbers**

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test.

**Here's How It Works:**

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

## Ag Commissioner Miller speaks at RWOYA meeting

### SPECIAL TO THE INQUIRER

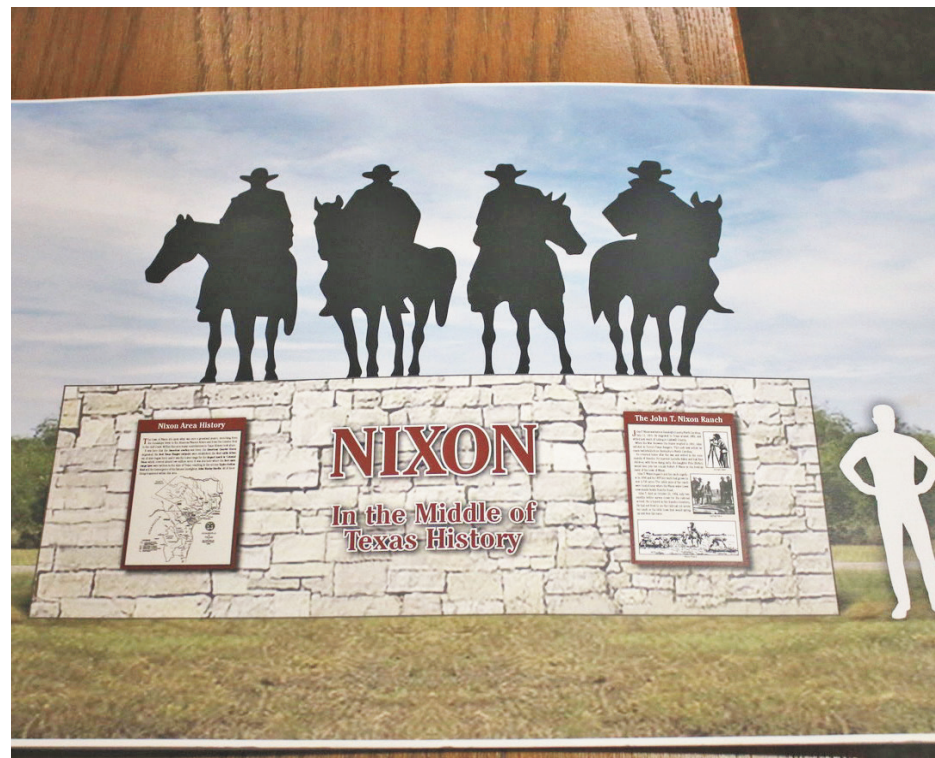

The Texas Department of Agriculture (TDA) was created by the Texas legislature back in 1907. This state agency's key objectives are to promote: production agriculture, consumer protection, economic development, and healthy living.

For its April 12 meeting, Republican Women of Yoakum Area (RWOYA) had

Miller

current Commissioner Sid Miller, who is serving his third term, speak about these key objectives and how the agency partners with Texans to cultivate winning strategies for rural, suburban, and urban Texans at the Yoakum Community Center, 105 Huck St, Yoakum.

as chuckwagons and mounted cowboys roaming through the park to celebrate the area's role as origin point of the American quarter horse and the probable origin of the American cowboy, who descended from the Spanish vaqueros.

Rancho Nixon Historical Association founder Donald Hoffman has previously said the organization has spent nearly \$200,000 in private donations to develop the historical park.

The organization also entered into a 10-year lease in March 2022 with the City of Nixon to turn

the former Nixon Police Department building at 106 W. Third St. into a future museum site to chronicle the history of Nixon and its predecessor, the Rancho Community, which existed about a mile or so north of present-day Nixon until its post office closed in 1911.

There are an additional 156 Texas historical markers erected in the area, including 31 which are about famed gunslinger John Wesley Hardin, who practiced law in the Gonzales and Nixon area in the 1890s after he was released from jail.

in the City of Nixon," said William Linn, a spokesperson for the Kenedy Housing Authority. "Twelve percent of our children and 19% of our seniors are living in poverty here in Nixon. The low to moderate income percent which is used to determine whether or not you can get a CBDG grant in the state of Texas, for Nixon, is 52.37%, which means

that 451 households in Nixon either live in poverty or are just barely getting by."

The medium household income is \$60,000 and the overall poverty rate of Nixon is 11.3 percent, according to Linn. The food bank would be quarterly, if approved, and will come from representatives in San Antonio.

The City of Nixon and Republic Services will

also be having its annual brush pile cleanup starting the week of May 8. Only those in the City of Nixon and with Republic services will have their brush picked up. The city is asking residents to limit brush piles for three cubic feet within eight feet of the curb.

Nixon is also in preparations for the Feather Fest, which will include a Cinco De Mayo parade.

Both women were hit with 10 counts of smuggling of persons for a pecuniary interest (aka for money) and evading arrest with a vehicle. Bond was set at \$10,000 for each count or charge.

Kinney County and Maverick County are both part of Operation Lone Star, of which Gonzales County is also a participant. Operation Lone Star is a joint mission between the

Texas Department of Public Safety and the Texas National Guard as well as other law enforcement along the southern border between Texas and Mexico. The stated purpose is to counter illegal immigration and the illegal drug trade.

Since the launch of Operation Lone Star in March 2021, the multi-agency effort has led to over 355,000 illegal immigrant apprehensions and more than 25,000 criminal arrests, with more than 23,000 felony charges reported.

spend the money or whatever it takes to have one, but I do think we need a fire marshal," Brzozowski said. "Jimmy already has a vehicle. He is a licensed officer. I think it would be good to make Jimmy our fire marshal. We talked a little bit about his budget and all he would need would be a little extra for fuel sometimes."

Harless said he had spoken to another county about what he would need to do to get licensed and it would simply involve some online coursework on inspections, of which he would only need to perform about six to 10 per year for facilities in the county that are out of city jurisdictions.

"What we would do is gather some information on the fees and inspection sheets and bring that before the court to let you look at it and make a decision, because I do think there needs to be a charge for inspections," Harless said. "I'm already at any major incidents anyway and I think that with the contacts that I've developed with the state, especially with Guadalupe County ... I'm basically already doing most of it anyway, so it's more of a title."

Harless said one of Schmidt's investigators is already working on his arson inspection license and that would give the county another individual who could handle those types of cases.

"I think on an inspection side and the planning review side, that's extremely important (to have a fire marshal) now the way we're growing and it's already coming through my office anyway," Harless said.

Commissioners also voted unanimously to appoint Jacey Trammell to replace Christina Jahns on the Gonzales County Emergency Services District No. 1 board of directors.

Jahns resigned from the board as its treasurer after a letter went out to eight rescue team volunteers, terminating their membership for failing to meet training and participation requirements by not participating in at least 20 hours of training per year and not taking part in at least 25 percent of "calls" as defined by the district.

"While I appreciate the impact being a part of this organization has made on the community and myself, I no longer feel it is a fit for me," Jahns announced in a Facebook post back

in February. "After seeing the postings on social media regarding the letter received by volunteer rescue members which included my name in the heading, I felt this was done without my knowledge and with no prior notification that this would be taking place."

Trammell, along with her father Jason Haile, was one of those terminated members and she expressed an interest in filling Jahns' spot on the board during the public comments section of the meeting. No other candidate for the spot was named.

In other action, commissioners also approved a quitclaim deed of a 0.33-acre tract of land outside Nixon that is adjacent to the Latin-American Cemetery on Texas 80. The land, which is needed by the cemetery for additional parking, has been long maintained by the county and no other ownership interest could be found in the land.

"I had First Shot Surveying survey the property and they could not find any additional property owners that could possibly claim any ownership to this tract of land," Precinct 4 Commissioner Collie Boatright Jr. said. "After visiting with (County Attorney) Paul (Watkins), being that the county was a caretaker but technically not the owner, we were deciding what would be the best mode of transferring this property for use by the Latin American Cemetery Association."

Watkins said the quitclaim deed basically says the county is giving up any ownership interest it might have had in the property by transferring said interest to the other party.

# Texas Soil and Water Stewardship Week showcases the significance of watersheds

## SPECIAL TO THE INQUIRER

The Texas State Soil and Water Conservation Board (TSSWCB) and the Association of Texas Soil and Water Conservation Districts are joining organizations across the state in a campaign to highlight the importance of voluntary land stewardship in Texas. Soil and Water Stewardship Week is April 30 through May 7, 2023, and the focus this year is "One Water."

Watersheds come in all shapes and sizes, covering every inch of the Earth. However, what is a watershed? A watershed is an area of land that channels rainfall and snowmelt to creeks, streams, and rivers, eventually leading to outflow points such as reservoirs,

bays, and oceans. Those bodies of water are all connected, so every drop that falls on Earth becomes part of one water.

At 268,597 square miles, Texas is the second largest state in the nation. Within Texas' massive acreage, there are approximately 191,228 miles of streams and rivers, more than 8 million acres of inland and coastal wetlands, and more than 3 million acres of reservoirs and lakes. Every inch of land that makes up our great state is part of a watershed, which means we all live in a watershed. We are all a part of one water.

Of all the water used in Texas, roughly 40 percent is drawn from surface water sources and 60 percent from groundwa-

ter sources. We share the water in our watershed with our neighbors, livestock, wildlife, forests, and cropland, as it is all one water.

By 2070, the population of Texas is expected to nearly double, with the demand for water increasing by 17 percent. The supply of water from existing sources in Texas will be 11 percent smaller than it is today. If we do nothing, approximately four out of five Texans will face a water shortage in their cities and residences. There is no natural resource with greater significance for the future of Texans than one water.

Texas also has a vital role in contributing to international demand for goods. For almost two decades, the U.S. Department of Commerce's Bureau of Economic Analysis, has ranked Texas as the No. 1 exporter among U.S. states. Water is crucial to the manufacturing of exported goods. It is also crucial to the transportation of those goods. Texas moves 597.5 million total tons of cargo, making it No. 1 in the U.S. for maritime commerce. This would not be possible without one water.

Since 1939, the TSSWCB and Soil and Water Conservation Districts (SWCD) across Texas have been working to encourage the wise and productive use of natural resources. It is our goal to ensure the availability of those resources for future generations, so that the needs of all Texans can be met in a manner that promotes a clean, healthy environment and strong economic growth.

Your local SWCD can work with you

to develop a conservation plan for your farm, forest, or ranch to improve water quality and quantity while providing resources on responsible natural resource management. These voluntary plans can be tailored to meet the conservation needs and goals of each individual landowner.

TSSWCB, SWCDs, and our conservation partners are committed to working with farmers, ranchers, and forest landowners to conserve and protect the natural resources of Texas. As the population of the state continues to grow, maintaining the productivity of our soil and water resources becomes increasingly vital in meeting the food, fiber, and water needs for all Texans. We must do our part to protect one water.

Partnering organizations in the "One Water" campaign includes Agriculture Teachers Association of Texas, AgriLife Extension, Ducks Unlimited, Texas A&M Forest Service, Texas A&M Natural Resources Institute, Texas Agricultural Cooperative Council, Texas Association of Dairymen, Texas Conservation Association for Soil and Water, Texas Corn Producers, Texas Forestry Association, Texas Hemp Coalition, Texas Hemp Growers Association, Texas Quarter Horse Association, Texas Watershed Steward Program, Texas Wildlife Association, The Nature Conservancy, Upper Trinity Conservation Trust, and USDA-Natural Resources Conservation Service.

# Entelekchewul On Board

Hey there y'all. As you undoubtedly noticed from today's title, which also happens to be the bumper sticker on my spacecraft, I'm no wordsmith, and even a worse speller, but I can assure you that my intentions are honorable. I often joke (or am I?) about being from Zerlok, a small planet on the far edge of our galaxy, where if you have an IQ in the double digits you're considered to be a genius of sorts. I sometimes get a little homesick, as we all got along, had each other's back and loved our creator, something we all pray for earthlings to someday achieve, and although it hasn't happened yet, we're still very hopeful. Of course, here on earth, due to the intergalactic exchange rate, you'll need an IQ in the high triple digits just to keep up with us, so just do your best 'cause, we ain't judgemental!

I still find certain things here on earth perplexing, such as: If my uncle had multiple wives and they all gardened, wouldn't he technically live on an aunt

farm? When going to look for a townhouse to buy, shouldn't we first freshen our breath with a condo-mint? Wouldn't a sheep herder in Germany be considered a German Shepherd? If a driveway contractor accidentally dropped his belt into the wet mix, wouldn't that be to his benefit, as we've all heard that after a hard days work, a stiff belt can help us relax? Shouldn't salmon swim downstream to spawn? If I were a salmon, my answer would be sorry honey, long day at the office, just not in the mood!

Fortunately, whether we believe there's intelligent life on other planets or not, mankind is now working vigorously to develop artificial intelligence, since the real thing seems to be lacking in so many areas. Just hope they develop some artificial common sense to complete the package, but as of this press release, no such luck. Just recently, Elon Musk and other top tech scientists are calling for a six month halt on more AI development until more is understood, and more

**ERIC ESTES**  
Love, Eric and Eloise

stringent safeguards can be put into place, before getting so far down the road that it's out of control and may not be able to be stopped. Critics sight that it's not AI, it's AI in the wrong hands that we should be wary of. Is it just me, or do both scenarios sound like a bad deal? Human beings seem to have great capacity for invention, but lack the sense, wisdom and foresight to look ahead at potentially negative outcomes.

Although a great source of convenience with many positive benefits, since the invent of the internet, we've also seen an increase in crime, violence, depression, intolerance and division. It seems that most perceived leaps forward always come with an evil sibling lurking in the shadows. The atomic bombs detonated in Japan were in

hopes of ending WW2, and saving American lives. Today there are enough nuclear weapons to render mankind extinct many times over, with more continually being produced. It seems a manipulated virus recently escaped, killing more than six million people globally. We've managed to set ourselves up for catastrophic failure, being tied to an outdated electrical grid, with everything we do relying on computers and the internet. Talk about the lack of wisdom in putting all our eggs in one basket, but yet this is our reality. If AI (no love, sympathy, integrity or morals) ever advances to the point that it sees us as a nuisance, well, you do the math.

Matthew 24:44 reminds us that we must always be ready, because Jesus will return when least expected. Today seems like a good day as any if you haven't accepted Christ already, 'cause you just never know, and that my friend is... real intelligence!

Hang in there, Love you guys, Eric.
